The CARE Climate Change and Resilience Platform (CCRP) is looking for

**CCRP CLIMATE AND RESILIENCE SPECIALIST (1,0 FTE)**

*Do you want to work as a climate and resilience specialist in the humanitarian/development sector and want to facilitate collaborative engagement with CARE offices in over 80 countries? Then we are looking for you!*

**Who we are**
The CARE Climate Change and Resilience Platform (CCRP) is a global platform across CARE International (CI) that unites CARE's work on climate change, and on increasing poor people's resilience—key priority areas in the CARE 2020 Program Strategy. The CCRP aims to support and strengthen the ability of CARE members and partners to increase resilience and to tackle the causes and consequences of climate change. This is done by strengthening the capacities of the most vulnerable communities and by growing CARE's impact, influence and income to better serve the needs of these communities. The CCRP is led by CARE Nederland and is accountable to a CCRP Council of directors, consisting of the 6 investing members (CARE Denmark, CARE International UK, CARE Deutschland-Luxembourg, CARE France, CARE Canada and CARE Nederland).

**The position**
The Climate and Resilience Specialist will contribute to the CCRP on behalf of CARE Nederland with particular focus on facilitating the collaborative engagement of CARE offices (COs) in Asia and the Pacific, leading on data analysis related to climate change and resilience in CARE’s global programming, and leading the confederation’s climate smart efforts. The role will contribute directly to the integration of Climate Change and Resilience in CARE’s programmatic work across the world and to the realization of a climate smart confederation. The specialist will also help COs to connect strategically through joint planning, information sharing and knowledge management.

**The Climate and Resilience Specialist acts on the following areas:**

**CCRP’s MEL efforts (40%):** He/she leads the validation of the Climate and Resilience related data gathered in CARE’s Project and Program Information and Impact Reporting System (PIIRS). He/she analyzes and produces annual reports and visuals on these data and facilitates the dissemination of the analysis and associated learnings. He/she leads the development and/or revision of MEL guidance and tools related to Climate and Resilience. He/she identifies the learning needs of COs in terms of Climate and Resilience MEL and provides regular technical support and training to the confederation and develops content for the CARE Climate and Resilience Academy. He/she liaises and works with CARE’s global CI- MEL team.

**Knowledge management, learning and sharing in Asia and the Pacific (30%):** He/she facilitates the connection and knowledge sharing between the COs in the region and offers technical support on proposal development, strategy development or program implementation. He/she contributes to the work of the knowledge management and learning officer by sharing tools, lessons, case-studies, data etc. from Asia and the Pacific.

**Development and implementation of a CARE wide strategy on becoming climate-smart (20%):**
He/she trains the confederation in the use of the PIIRS climate smart indicators, produces an annual CARE Climate Smart Report and facilitates the connection of green teams across the confederation. He/she leads the development of a CARE offsetting programme in collaboration with CARE India and
CARE France. He/she supports CCRP global leader in the development of propositions to CARE International to improve CARE's "becoming climate smart"- objectives and policies.

Provide support to other team members (10%): He/she supports the CCRP team or global lead in other relevant activities, like: Fundraising or designing proposals, development of CARE climate and resilience strategies, development and upkeep of a range of materials that articulate CARE’s climate and resilience approach and the efforts to facilitate innovation and bring success to scale by developing new products and tools connect with knowledge institutes to increase visibility of CARE’s knowledge.

We are looking for a candidate who meets the following qualifications:
- Academic level in the climate change and resilience area or any closely related area;
- Keen knowledge and experience of at least 5 years on Climate Change and Resilience and related topics;
- Experience with planning, monitoring and evaluation;
- Good knowledge of qualitative and quantitative research/evaluation methods;
- Experience with systems, big databases and the creation of reports and dashboards;
- Experience in Asia or the Pacific;
- Excellent command of English verbally and in writing;
- Proactive attitude and willing to further develop knowledge and skills;
- Prepared to travel abroad;
- Excellent communication skills; intercultural sensitivity; analytical; accurate; flexible; immune to stress; and team player.
- Affinity with the CARE Nederland core values: Respect, Reliability, Commitment and Quality.

CARE has a zero-tolerance policy towards sexual exploitation and abuse and child abuse and takes seriously all concerns and complaints about sexual exploitation and abuse and child abuse involving CARE Employees and Related Personnel.

We offer:
- A one-year full time contract (38 hours a week) with possible extension.
- A gross monthly salary based on BBRA scale 10 (EUR 2,889,63 – EUR 4,644,63), classification depends on relevant working experience.
- International work environment in which you work with colleagues from different backgrounds.
- Depending on your country of residence, your position will be located in the CARE office in your country with the possibility for working from home two days a week.

Interested?
We are looking forward to receiving your motivation (1 A4) and resume via the link mentioned below, before April 30, 2020. Please apply: https://cvselection.net/ccrp-climate-and-resilience-specialist
